

3x2 Pop-Up System (Curved Specification)

Our preferred format for receiving artwork is as high resolution PDF file with all fonts embedded. If you are unable to supply a PDF please look at the Supplying Files on our website.

We suggest that artwork is originated at quarter size - see details below for size specifications

In order to produce an acceptable halftone result on the final output it is recommended that any pictures (bitmaps, jpg, tif etc.) are **at least 150dpi at finished size**. Therefore if you are working at **quarter size any pictures should be 600dpi**. Failure to observe this rule could lead to disappointing results.

3x2 Graphic Dimensions

Overall artwork size:

2235 x 2346mm

All images **150dpi at finished size**

Quarter size document:

558.75 x 586.5mm

All images **600dpi at quarter size**

Rear graphics panel widths (if required)

For sets which are being covered on both sides of a curved set the rear central panels (2 & 3 on the diagram above should each measure 812mm in width. They are widened to account for the wider radius.
